MARKET CLOSED HEAVY. In the Final Hour the Selling Movement Showed Great Force.

New York, Aug. 19 .- Wall Street received an unexpected reminder to-day that a state of war exists across the water. The market, which had been under pressure in the early hours, broke abruptly in the afternoon on news that a German submarine had sunk another British liner. United States Steel, weakest of the leaders up to midday, fell over two points and other stocks of almost equal prominence showed losses of one to two, while a few of the recently exploited specialties added two to five points to their reverses of the fore-noon. From this level most stocks made partial recovery, only to fall to lower levels in the final hour, when the selling movement gathered great-er force. The closing was heavy to weak with only slight recovery from weak, with only slight recovery from minimum quotations. Even before word of Germany's lat-

est marine exploit became generally known there was an absence of the recent buoyancy and open manipulnrecent buoyancy and open manipulation in the so-called war stocks. In fact, Bethlehem Steel common and preferred were conspicuously weak, also Westinghouse Electric, Pressed Steel Car, General Electric and the principal motor issues, losses in this group ranging from 3 to 10 points. New York Air Brake was the only noteworthy exception, at one time showing a gain of 11 points, part of which was lost later.

In the main, railways showed underlying strength, holding within a point or thereabouts, with the exception of Reading and Canadian Pacific, which recorded wider fluctuations.

which recorded wider fluctuations. The day's total transactions of 1,145,-000 shares exceeded any session of recent months.

For the first time this week foreign exchanges placed little or no part as a market factor. Demand sterling was a shade harder than yesterday's best and francs made further material recovery from their recent weakness. Bankers continued their "credit" con-ferences, but the plan to establish new British and French loans in this market remained in abeyance. The Bank of England increased its

gold holdings for the week by almost \$7,000,000, while the Bank of France gained almost twice that amount of the precious metal The local bond market continued to recede moderately on more "future" or

foreign selling. Total sales, par value, were \$2,755,000. United States bonds were unchanged
